

PRESS RELEASE FOR IMMEDIATE USE

Dechra Veterinary Products Announces New Vetivex® IV Fluids Calculator App

Dechra Veterinary Products is pleased to announce the introduction of the Vetivex® IV Fluids Calculator App. This is a free, easy to use app to aid in determining fluid volume requirements for veterinary patients.

The Dechra Veterinary Products Vetivex IV Fluid Calculator provides assistance in calculating IV fluid requirements and infusion rates in dogs, cats and horses for veterinary professionals.

This IV Fluid Flow Rate Calculator assists in generating a fluid plan by using parameters that assess hypovolemia, dehydration, ongoing losses and physiologic fluid requirements. Please note that these results are recommendations only. Fluid therapy must be tailored to the individual patient's needs.

Dechra's Vetivex IV Fluid Calculator is available for use on iPhone, iPad, and Android devices and Veterinary Professionals can download this convenient app by either downloading it on iTunes or Google Play for free or by scanning the QR Code.

The App also provides information on Vetivex Fluids and support materials and valuable contact information on veterinary technical support and sales.

Dechra Veterinary Products provides Reliable Solutions for Veterinarians. Vetivex is available in five of the most commonly used crystalloids, Lactated Ringers Injection, USP, pHyLyte™ Injection pH 7.4 (Multiple Electrolytes Injection, Type 1, USP), Hartmann's Solution, 0.9% Sodium Chloride Injection, USP and Lactated Ringer's and 5% Dextrose Injection, USP. It is offered in 10 practical color coded sizes suitable for both companion animal and equine patients. All 1000 mL bags and under are DEHP, Latex and PVC Free Bags; all 5000 mL bags have 3 multipurpose ports.

To order Vetivex IV Fluids or to schedule a Perfusion lunch and learn, call your Dechra representative or Customer Support at (866) 683-0660.
